

Policy views, Industrial Symbiosis Delivering across Themes and Scales

G7 – Workshop on Industrial Symbiosis

October 29, Thursday

Zénaïde HUBERT-KHAN

CGDD/SEEIDD/IDAE1 – Chargée de mission - Bureau des
secteurs professionnels

zenaide.hubert@developpement-durable.gouv.fr

A guide to take action in the territories

A definition of the Industrial and Territorial Ecology in Energetic Transition for the Green Growth law

Article 70

The Industrial and Territorial Ecology « consists, on the base of a quantification of flows of ressources, and particularly materials, energy and water, in optimising flows of ressources used and produced at a relevant territory scale, as part of actions of cooperation, mutualisation and substitution of these flows of ressources, limiting in this way the environmental impacts and improving the economic competitiveness et the attractivness of the territories. »

To develop the industrial symbiosis...

A photograph of a dense forest with tall, thin trees and vibrant green foliage. Sunlight filters through the canopy, creating a bright, airy atmosphere. A horizontal green banner is overlaid across the middle of the image, containing the text "Thank you for your attention".

Thank you for your attention
