

Capacity Building and Programme Implementation

International Synergies Limited offers a turnkey solution for implementing industrial symbiosis. Based on extensive experience developing and managing programmes world-wide, International Synergies can deliver an industrial symbiosis programme appropriate to an area's industrial demographic profile.

Who Benefits?

National and regional governments tasked with economic growth and environmental sustainability; local economies and communities; organisations offering support to businesses within a region.

How Does it Work?

International Synergies provides the expertise, information management systems, and tools to support the implementation and development of an industrial symbiosis programme. Our experts work closely with in-region project delivery partners and businesses.

International Synergies provides support through the following phases:

- Identify potential benefits of an industrial symbiosis programme for your local region;
- Help build local project team and set key performance indicators;
- Implement bespoke software and management systems;
- Provide dedicated project manager;
- Support local project team to identify and progress synergies; and
- Ongoing technical and innovation support.

International Synergies Limited has supported the implementation and development of industrial symbiosis based projects in the UK, China, USA, Romania, Hungary, Slovakia, Belgium, Turkey, Mexico, Australia, Brazil, South Africa and Poland.
